About Us

Kern AG develops user-friendly **software solutions**
for corporate planning and reporting.
With our Sparks **Excel add-in**, your key figures are prepared in
a matter of seconds and transformed into **dynamic reports**.

⚡ Uniform & Intuitive

Thanks to the integration of IBCS, Sparks provides a
uniform report design and clear presentation of charts.
This enables you to convey meaningful information and
focus on key data. The self-explanatory layout of the
controls makes the user interface extremely intuitive.

🚀 Quick & Compatible

Sparks enables you to create professional charts
and graphs in less than a minute. The formula-based
graphics allow you to use the full range of functions in
Microsoft Excel to do so. This means that Sparks can
also be easily integrated into your SAP system using the
Excel Inplace functionality.

📊 Dynamic & Individual

Thanks to the dynamic functionality, graph sizes and
elements can be adapted individually or automatically
and in the correct scale for each chart. You can com-
bine different chart types within one cell, be they bar
charts, line graphs or scatter diagrams, and use your
own Corporate Design templates.
